

Destinies (Visions of the Future Book 1)

There are as many predictions of mans future as there have been visionaries. From varying degrees of apocalypse through dystopian societies to utopias made or delivered. Within this book you will find sixty-nine visions of where humanity could go and what they might get up to. Told from viewpoints ranging from the common man to the leaders of worlds and the inhabitants of others, this volume provides a kaleidoscope of possibilities for your consideration. Using the flash fiction format, originally attributed to Hemingway and gaining popularity as a medium for visceral storytelling in a minimum of words, interspersed with short fiction pieces, this collection will take you far from today to places you may not be comfortable in, but will be glad you visited. Food for thought and imagination in stories that can be read individually during moments of leisure time in this increasingly hectic world.
